PROFILE

Computer Science student at Kasetsart University Sriracha with a strong passion for Artificial Intelligence Computer Vision, and Machine Learning pipelines. Experienced in Python programming, basic machine learning concepts, and machine learning pipeline development. **Language Skills Thai (Native) , English (Intermediate)**

Technical Skills

- | | |
|--|--|
| 1. Programming Languages : Python, Java, Dart | 5. Research & Documentation |
| 2. Databases : MySQL, SQLite, Fastapi | 6. AI/ML : Computer Vision, NLP, LLM Integration, yolo |
| 3. Frameworks & Libraries : Flutter, OpenCV, TensorFlow, PyTorch and more | 7. Tools & Platforms : Git, Figma, Postman, MobaXterm |
| (Quick learner of new frameworks) | Vercel |

EDUCATION

Bachelor of Science in Computer Science | Kasetsart University Siracha Campus

2022 - 2026

Computer Science Siracha | GPA : 3.54

INTERNSHIP EXPERIENCE

- | | |
|--|---------------------|
| ☉ Smile Heart Food Co., Ltd. – Maintenance Department | May 2025 - Jul 2025 |
| Maintenance Management App Developer (Intern) | (2 Months) |
| <ul style="list-style-type: none">• Designed the system architecture for a Maintenance Management (PM) application• Designed and implemented a maintenance workflow system for internal operations• Gathered requirements from stakeholders and documented workflow improvements | |
| ☉ Kyungpook National University @ South Korea | Sep 2025 - Dec 2025 |
| Research Assistant (Computer Vision) | (3 Months) |
| <ul style="list-style-type: none">• Developed and optimized deep learning models and data pipelines• Performed data analysis, model evaluation, and research documentation• Assisted in reviewing and summarizing research papers | |

PROJECT EXPERIENCE

Academic Project Experience

- 1. Human Entry/Exit Detection System (Super AI Engineer Program 2025) |**
 - Developed a real-time system using YOLOv8 to detect and track individuals entering or exiting specific zones.
 - Integrated a web dashboard for logging timestamped entry/exit data and image captures for security auditing.
- 2. Sentiment Analysis (2023) | ML / NLP Project**
 - Built a text classification using Naive Bayes and K-Nearest Neighbors (KNN) to analyze customer sentiment.
 - Developed a seamless integration with LINE Messaging API and a web interface for real-time user interaction.
- 3. FaceLab Senior Project (2026) | Computer Vision Project / LLM**
 - Developed a web platform utilizing a microservices architecture to integrate multiple AI models.
 - Implemented LLM integration to provide an interactive interface for managing recognized profiles and system.
 - Engineered core features including AI Background Removal/Replacement and Face Swapping (Single, Group, and Real-time Live streaming).
- 4. Fitness APP System Analysis & Design (2024) | Sa Project**
 - Designed a Fitness App using use case diagrams and prototypes with System Overview, Activity Diagram, Use Case Diagram, Dataflow Diagram, Sequence Diagram, figma.
