PROFILE

Computer Science student at Kasetsart University Sriracha with a strong passion for Artificial Intelligence Computer Vision, and Machine Learning pipelines. Experienced in Python programming, basic machine learning concepts, and machine learning pipeline development.

Technical Skills

1. **Programming Languages** : Python, Java, Dart
2. **Databases** : MySQL, SQLite, Fastapi
3. **Frameworks & Libraries** : Flutter, OpenCV, TensorFlow,PyTorch and more (Quick learner of new frameworks)
5. **Research & Documentation**
6. **AI/ML** : Computer Vision, NLP, LLM Integration
7. **Tools&Platforms**: Git, Figma, Postman, MobaXterm Vercel

EDUCATION

Bachelor of Science in Computer Science | Kasetsart University Siracha Campus 2022 - 2026

Computer Science Siracha | First-Class Honours | GPA : 3.54

INTERNSHIP EXPERIENCE

Smile Heart Food Co., Ltd. – Maintenance Department May 2025 - Jul 2025

Maintenance Management App Developer (Intern) (2 Months)

- Designed the system architecture for a Maintenance Management (PM) application
- Gathered requirements from stakeholders and documented workflow improvements
- Engineered a paperless management application with dashboard that streamlined manual processes and reduced turnaround time for both staff and managers.

Kyungpook National University @ South korea Sep 2025 - Dec 2025

Research Assistant (ComputerVision) (3 Months)

- Developed and optimized deep learning models and data pipelines
- Performed data analysis, model evaluation, and research documentation
- Assisted in reviewing and summarizing research papers

Growth Innovation Co ltd May 2026 - current

Solution Consultant (5 Months)

- Led system demos, gathered requirements, and configured custom client solutions.
- Prepared comprehensive project documentation and proactively tracked progress to provide regular updates to clients.
- Developed and deployed tailored CRM and AI (Agentforce) solutions

PROJECT EXPERIENCE

Academic Project Experience

1. Human Entry/Exit Detection System (Super AI Engineer Program 2025) |

- Developed a real-time system using YOLOv8 to detect and track individuals entering or exiting specific zones.
- Integrated a web dashboard for logging timestamped entry/exit data and image captures for security auditing.

2. FaceLab Senior Project (2026) | ComputerVision Project / LLM

- Developed a web platform utilizing a microservices architecture to integrate multiple AI models.
- Implemented LLM integration to provide an interactive interface for managing recognized profiles and system.
- Engineered core features including AI Background Removal/Replacement and Face Swapping (Single, Group, and Real-time Live streaming).

3. Fittness APP System Analysis & Design (2024) | Sa Project

- Designed a Fitness App using use case diagrams and prototypes with SystemOverview, Activity Diagram, Use Case Diagram, Dataflow Diagram, Sequence Diagram, figma.
